

Installation instruction for international fonts

Installing the fonts

Copy the GTW420_8859-4.ttf file and the GTW_8859_4.fon file to the GTW420-Pro folder. Open the Control Panel | Fonts | File | Install new fonts - and install the files. They will appear in the selection box as "GTW420 8859-4 (true type)" and "GTW420 Font LAT-4"

Using the new installed fonts

GTW420-Pro keep it's configuration data in a file with GTW extension. To find out the name of configuration file you are using, click the GTW420-Pro's shortcut with the right mouse button and select "Properties" . In the "Target" field you will see the path to the GTW420.exe file and the name of the configuration file.

In order to use the international font you have to edit the configuration file and add the following statements .

```
[FontCtrl]
UserFontTTF=GTW420_8859-4A
UserFontFON=VTASCII_8859_4
```

```
[GRAPHIC_PRINTING]
FaceName=GTW420_8859-4A
```
